

TAASH CHIKOSI

I BUILD AGENTIC AI

taashira.wesley@outlook.com | [Sydney](#) | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Energy engineer turned AI developer with 3+ years delivering energy efficiency solutions in 150+ buildings. Expanding on my background to build agentic systems and automate workflows that generate measurable business value.

PORTFOLIO PROJECTS

Agentic AI

- Architected a 5-agent LangGraph system to simulate building energy consumption, cost and carbon emissions.
- Built a deterministic contract-review pipeline with a single agentic verification loop that flags high-risk clauses.

Agents

- Document Intelligence Agent* - reads supplier bills to catch discrepancies.
- Retail Analyst Agent* - looks at the shops data and answers owners questions.

Machine Learning:

- Built 4 machine learning projects across multiple domains.

EDUCATION

Applied Agentic AI for Organizational Transformation | May 2026 - Jul 2026 | MIT | Massachussets, USA

- Courses: AI Risks and Cybersecurity Plan, AI Agents by Business Function, Connecting Agents to Digital Ecosystems*

Master of AI in Business | Sep 2025 - Sep 2027 | SP Jain School of Global Management | Sydney, Australia

- Courses: AI Strategy and Innovation Management, Ethics Sociology and Governance of AI, Economics*

Bachelor of Engineering: Sustainable and Renewable Energy | Graduated 2021 | Carleton University | Canada

- Relevant Courses: Probability and Statistics, Multivariable Calculus, Linear Algebra, Renewable Energy Generation*

Certifications: Microsoft Azure AI Apps and Agents Developer Associate 103 (ongoing) | AI Product Management | Google Data Analytics Certificate | Case Based Frameworks for Management Consulting

TECHNICAL SKILLS					SOFT SKILLS
LangGraph	API Integration	Machine Learning	VPS Deployment	n8n/Zapier	Project Management
LangChain	RAG	Python	PostgresSQL	Next.js	Client Communication
LangFuse	MCP	SQL	Docker	Power Bi	Consulting

WORK EXPERIENCE

AI Intern | Occubuy | Mar 2026 – Present | Sydney, Australia

- Prototyping an AI property matching and buyer guidance system, leveraging LLMs, RAG pipelines, and vector embeddings to generate personalized recommendations and financial behavior insights through machine learning.

Building Performance Specialist | AME Group | Feb 2023 – Apr 2025 | Calgary, Canada

- Performed energy modeling for 70+ commercial projects across Canada to forecast gas and electricity consumption, saving clients time and money through streamlined early design phase decision-making.
- Delivered carbon emissions reduction and cost-optimization insights through parametric analysis, successfully determining inputs sensitive for reaching energy targets.
- Calculated building loads, aiding the HVAC team to optimize system design, sizing and selection for efficiency.
- Initiated workflow improvements and presented them to internal stakeholders, spearheading reduced project turnaround times and skills in project management.

Energy Advisor | AmeriSpec Inspection Services | Sep 2021 – Sep 2022 | Ottawa, Canada

- Executed 100+ home energy evaluations, aiding in the reduction household energy costs by 5% - 15%.
- Translated technical assessments into clear, actionable recommendations, enhancing homeowner understanding and engagement, while gaining skills in consulting and client communication.
